

Malletts Bay Sewer Project Update

May 9, 2024

Announcements

- This meeting is specifically for residential properties who will be connected to the new sewer line, and for property owners located along Blakely Road where no connections will be made to the sewer line, yet construction will be occurring along the roadway.
- Tonight's meeting is specifically to discuss the advancement of construction of the Malletts Bay Sewer Project. For all other questions related to the project, please contact us at 802-264-5620, or at MBS@colchestervt.gov.

Project Schedule

Project Schedule

Location	Normal Work Hours	Night Work Hours	Estimated Work Period
Blakely Road	M - F 7am - 5pm	N/A	June '24 - May '25
West/East Lakeshore Drive	M - F 7am - 5pm	M – F 9pm - 7am	June '24 - August '25

Winter Shutdown November to April (Estimate)

Traffic Control

Traffic Control

Blakely Road

General:

- Work is along the roadway shoulder with minimal disruptions to traffic
- Variable message boards and signage
- Flaggers and Uniformed Traffic Control Officers when needed to maintain the safe and orderly flow of traffic
- Maintain property access at all times
- Maintain emergency access at all times
- Maintain pedestrian access at all times
- Observe special requirements for the Colchester School District
- Contractor to submit additional traffic control details for review and approval by the Town prior to work proceeding

Traffic Control

West and East Lakeshore Drive

General requirements for all work:

- Variable message boards and signage
- Flaggers and Uniformed Traffic Control Officers when needed to maintain the safe and orderly flow of traffic
- Maintain property access at all times
- Maintain pedestrian and emergency access at all times
- Contractor to submit additional traffic control details for review and approval by the Town prior to work proceeding

Traffic Control: West Lakeshore Drive

Specific requirements:

- Minimum one lane alternating traffic at all times including when work occurs during off peak hours
- Two-way traffic at the end of each work day/period
- Immediate notification to job site of emergency service vehicles

Colchester
VERMONT

Traffic Control: East Lakeshore Drive

Specific requirements:

- Two lane road closures allowed during work day
- Temporary detour on Williams Road during work day
- Accessible to local traffic from at least one direction at all times
- One lane traffic at end of work day with a temporary portable traffic control signal or other approved method

Frequently Asked Questions

Colchester
VERMONT

Frequently Asked Questions

1. Will there be traffic congestion and delays?

While we will take every reasonable step to minimize traffic congestion and delays, these will be unavoidable and should be expected and planned for.

2. Will there be noise from the construction work?

Yes, noise from large scale construction projects is unavoidable. Normal work hours will be limited to Monday through Friday from 7:00 am to 5:00 pm. There will also be off-peak hours allowed on West Lakeshore Drive from 9:00 pm to 7:00 am for the installation of service laterals. While we would prefer not to perform work during the evening hours, this is the time of day where the least amount of traffic is on West Lakeshore Drive, including emergency responders.

3. Will there be dust from the construction work?

Yes, dust from large scale construction projects is unavoidable. Contractors will be required to control dust as best they can through the application of dust control agents, but motorists and property owners should expect some level of dust through the construction areas.

Other questions you may have

4. Will I be able to get my mail?

We are coordinating with the U.S. Postal Service to ensure normal mail delivery will be affected as little as possible.

5. Will the school buses be able to pick up our children for school?

We are coordinating with the Colchester School District and their bussing contractor to ensure that student transportation will be affected as little as possible.

6. Will trash haulers be able to pick up our trash?

We are coordinating with local trash and recycling companies to ensure that trash collection will be affected as little as possible.

7. Will contractors be coming onto my property?

Contractors will only be allowed on those properties where the Town has made prior formal agreements with you to allow it.

Other questions you may have

8. Will there be pot holes and rough roads through the construction area?

Yes, these road conditions are unavoidable during large scale construction projects. The contractor will be required to maintain a driving surface that is as smooth as reasonably possible given the conditions.

9. Will the roadways be repaved following construction?

Yes, during construction disturbed areas in the roadway will be left as gravel. Prior to winter shutdown, temporary pavement will be placed. When all work has been completed permanent pavement will be placed in disturbed areas.

10. When will I be connected to the new sewer system and when will my septic system be decommissioned?

Service connections for properties on East & West Lakeshore Drive are expected to take place in the 2025-2026 timeframe. Goodsell Point properties are expected to be connected in in the 2026-2027 timeframe. Septic systems will be decommissioned after properties are connected to the new system.

2025-2027 Construction Work

Communication Efforts

- Public outreach and communication team formed by Town
- Project Website: **[Tinyurl.com/ColchesterSewer](https://tinyurl.com/ColchesterSewer)**
- Contact numbers for concerns or questions
- Multiple platforms to reach different audiences (social media, newsletters, website, newspaper, Front Porch Forum, brochures)
- Collection of email addresses to facilitate regular project updates
- Coordination with U.S. Postal Service and trash haulers
- Coordination with emergency services & Colchester School District
- Notification to neighboring municipalities
- Use of the Traffic Alert System at CCRPC and VTrans
